

Farwa Ramzan

Senior QA Engineer | QA Team Lead

+92 3022983734 | farwaramzan734@gmail.com | [in farwa-ramzan](https://www.linkedin.com/in/farwa-ramzan) | farich.app | Lahore, Pakistan

SUMMARY

Senior Quality Assurance Engineer and Team Lead with 5+ years in FinTech, web, desktop and mobile testing. Experienced in test planning, release management, UAT, risk management and estimation. Skilled in Selenium, Cypress, API and database testing, and CI/CD on Azure DevOps.

WORK EXPERIENCE

Stellarsoft

Senior Software Quality Assurance Analyst | July 2024 – Present

- Lead and mentor a team of 3 QA engineers, driving quality standards, code-of-practice adherence and continuous improvement across projects
- Ensure quality of FinTech platforms through functional, API and database testing, with focus on financial data accuracy
- Create test plans and test cases for functional, regression and integration testing
- Estimate effort and timelines for new change requests (CRs)
- Manage project risks and prioritize testing by business impact
- Collaborate and communicate effectively with team members during meetings and sprints
- Coordinate UAT with clients through to sign-off
- Run API testing (Postman, Bruno) and database testing (SQL, SSMS)
- Own release management: go/no-go decisions, deployments and post-release checks
- Deploy and manage QA environments through CI/CD pipelines on Azure DevOps, enabling faster, repeatable test cycles

Techverx

SQA Engineer | May 2022 – July 2024

- Executed functional, smoke, sanity, regression, integration and system testing across web and desktop applications, helping reduce production defects
- Improved release quality and stability by identifying and resolving critical defects before deployment, reducing post-release issues by 70%
- Logged, prioritized and tracked defects in Jira, collaborating with developers to cut average bug resolution time
- Designed and maintained test cases and a Requirement Traceability Matrix (RTM) to ensure 95–100% requirement coverage
- Participated in client communication and requirement gathering sessions to clarify scope and define acceptance criteria for new features
- Performed API and database validation to verify end-to-end data accuracy across integrated systems

G-Tek Solutions

Associate Quality Assurance | Oct 2021 – Apr 2022

- Design test plans, scenarios, or procedures.
- Document software defects, using a bug-tracking system, and report defects to software developers
- Participate in product design reviews to provide input on functional requirements, product designs, schedules, or potential problems
- Plan test schedules or strategies in accordance with project scope or delivery dates
- Test system modifications to prepare for implementation
- Monitor bug resolution efforts and track successes using Jira and click-up
- Testing Both Mobile Apps (Android & IOS)

EventBuizz

SQA Intern | Aug 2021 – Oct 2021

- Wrote test cases from business requirements
- Performed manual and black box testing on web and mobile app features
- Executed system, integration, UI/UX, regression, smoke and sanity testing
- Re-tested fixed defects and reported bugs to developers

SKILLS

- Release Management
- Test Planning & Case Design
- UAT Coordination
- Risk Management
- Selenium (POM Frameworks)
- Azure DevOps, CI/CD
- Agile/Scrum
- QA Process & Task Management
- Smoke, Regression & Re-testing
- Web, Desktop & Mobile Testing (Android/iOS)
- API & Performance Testing
- Database Testing (SQL)
- Bug Reporting & Documentation
- Defect Management
- Python

TOOLS

- JMeter
- Selenium (POM)
- Azure DevOps
- Docker
- Jira
- Cypress
- Orcastrator
- Load Runner
- ClickUp
- NetScaler
- Bruno
- SSMS
- Postman
- Visual Studio
- PowerShell

PROJECTS

- Orca (Multi-Clients), FinTech
- Light Point Financial Technology (FinTech)
- FrameSuite
- Engage Advisor
- HSP (Home School Panda)
- Orcastrator
- SharkFin Technology (FinTech)
- Pusic Mobile App
- EventBuizz App

QUALIFICATION

PMAS Arid Agriculture University

BS. Computer Science

CGPA 3.41/4.0

Sep 2017 – Sep 2021
